#### SUMMER I

PHS 788 <sup>3</sup>	Public Health Field Experience (6)
----------------------	------------------------------------

#### FALL II

ELECT	Approved MPH Electives
-------	------------------------

#### SPRING II

ELECT	Approved MPH Electives
PRG REQ	Capstone Project

#### FALL COURSES

BMI 511	Introduction to Biostatistical Methods for Public Health Professionals (3)
PHS 780 <sup>1</sup>	Public Health: Principles & Practice (3)
PHS 781 <sup>1</sup>	Introduction to Public Health Seminar (1)
PHS 797	Introduction to Epidemiology (3)
PHS 794 <sup>2</sup>	Biological Basis for Population Health (2)

#### SPRING COURSES

PHS 650	Social & Behavioral Sciences for Public Health Practice (3)
PHS 650	Principles of Environmental Health for Public Health Practice (3)
PHS 785	Health Systems, Management & Policy (3)

#### VARIABLE SEMESTER COURSES

PHS 787	MPH Field Experience Seminar (1)
PHS 788 <sup>3</sup>	Public Health Field Experience (6)
ELECT	Approved MPH Electives
PRG REQ	Capstone Project

#### NOTES ON COURSE SELECTION

- 1 POP HLTH 780 & POP HLTH 781. Public Health: Principles & Practice and Intro to Public Health should be taken during the first semester of enrollment.
- 2 POP HLTH 794. Biological Basis of Population Health is a required course for students who do NOT have a biological sciences background. This course should be taken during the first semester and must be completed prior to graduation. This course will count for elective credit.
- 3 PHS 788. Prerequisites to enrollment include POP HLTH 780, 787, and completion or concurrent enrollment in two additional core courses. The Field Experience may be taken during the fall, spring, or summer and can be spread out over multiple semesters.

ELECT Elective courses vary semester by semester. Courses should be chosen from the list of MPH approved electives.

PRG REQ The Capstone Project is a MPH program degree requirement. The Capstone Project includes a 10 minute presentation & 20-30 page paper about the student's field work project.
